### **INTERNATIONAL PRELIMINARY EXAMINATION REPORT**

International application No.

PCT/GB 03/04565

I. Basis	of the	report
----------	--------	--------

I.	Bas	sis of the report									
1.	the	With regard to the <b>elements</b> of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):									
	Des	Description, Pages									
	1-2	2	as originally filed								
	Cla	ims, Numbers									
	1-8		as originally filed								
2.	Wit lang	Vith regard to the <b>language</b> , all the elements marked above were available or furnished to this Authority in the anguage in which the international application was filed, unless otherwise indicated under this item.									
	The	ese elements were av	ailable or furnished to this Authority in the following language: , which is:								
		the language of a tra	anslation furnished for the purposes of the international search (under Rule 23.1(b)).								
			lication of the international application (under Rule 48.3(b)).								
		the language of a tra Rule 55.2 and/or 55.	anslation furnished for the purposes of international preliminary examination (under 3).								
3.	Witl inte	h regard to any <b>nucl</b> e rnational preliminary	ectide and/or amino acid sequence disclosed in the international application, the examination was carried out on the basis of the sequence listing:								
•		contained in the inte	rnational application in written form.								
•		filed together with th	e international application in computer readable form.								
		furnished subseque	ntly to this Authority in written form.								
		furnished subsequer	ntly to this Authority in computer readable form.								
		The statement that t in the international a	he subsequently furnished written sequence listing does not go beyond the disclosure pplication as filed has been furnished.								
		The statement that t listing has been furn	he information recorded in computer readable form is identical to the written sequence ished.								
4.	The	amendments have r	esulted in the cancellation of:								
		the description,	pages:								
		the claims,	Nos.:								
		the drawings,	sheets:								
5.		This report has been been considered to	established as if (some of) the amendments had not been made, since they have go beyond the disclosure as filed (Rule 70.2(c)).								
		(Any replacement sh	neet containing such amendments must be referred to under item 1 and annexed to this								

6. Additional observations, if necessary:

### **EXAMINATION REPORT - SEPARATE SHEET**

#### Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

15.17

The present invention relates to a method for controlling phytopathogenic fungi using a compound of formula (1) as set out in the present claim 1.

D1 (EP 0 001 721) describes different mildewicides with a structure having a very high analogy with the presently claimed ones. Especially compound 8 has the only difference of the presence of a bomine atom at the 4-position of the phenyl ring. The subject-matter of the present claims is thus believed to be new (art.33(2)PCT).

One skilled in the art expects similar properties from similar compounds. In the present case, a certain degree of fungicidal activity was predictable. However, the comparative data provided show an unexpectedly higher activity for compound 3 according to the present invention with respect to compound 8 of D1. Hence, the present invention is regarded as involving an inventive step (art.33(3)PCT).
